**Subject:** MPAs

Sirs,

I am in my 70s and have always lived in Ayr. I have watched with sadness the decline of the quantity and quality fish brought ashore here. I think the decline began with the eradication of the '3 mile limit'. The introduction of MPAs would be an enormous help in regenerating our fish stocks, but surely the re-introduction of the 3 mile limit around Scotland would be the best option? Our fishermen suffer from short termism, apparently having no regard for future stocks. Please do all you can to revert to a controlled fishing industry, not controlled by the EU, but by common sense.

R B Wallace Glendinning
