

<u>Question</u>	<u>Answer</u>
Do you support the development of an MPA network in Scotland's Seas?	No
Designation	I disagree if mobile fishing is effected, not knowing the area surely a local fisheries management plan with agreed sensitive areas off limits to mobile gear would be more sensible and less harm full to fishermen and also benefit the environment
Management Options	I disagree seafish has stated that dredging in shallow high tidal areas is the ideal area for dredging as winter storms do more damage and plants and animals in these areas are adapted to disturbance
Socioeconomic Assessment:	Fisheries management would make more economic sense, 3 mile limit twin rig also 5 aside dredge within this limit with sensitive agreed areas off limit to mobile gear and no fishing 9pm to 6am
Other Comments	on fishing side better environmental practice and management with the smaller boats only in inshore areas
