**RE: TRUMP INTERNATIONAL GOLF LINKS - SCOTLAND**

Dear Councillor Storr:

Please be advised that we have reviewed your false and ridiculous allegations with respect to public access issues at the Menie Estate. As we explained during recent meetings and discussions with the Aberdeenshire Council's public access officer, be assured that we have always and will continue to comply with relevant laws and have never barred the public from our site.

It is disturbing that you chose to voice these concerns through a Glasgow based public relations firm instead of the proper and customary channels. It is clear that your intentions are not constructive but are instead designed to harass and discredit our plans to construct a major golf, leisure and residential community in and for Aberdeenshire. When completed, it will be one of the finest developments of its kind anywhere in the World!

Let me remind you that every aspect of this project has endured greater public scrutiny than any other application in Scottish history. Every poll taken of the general public has shown overwhelming support for the project and after careful review and a long public inquiry, we prevailed and secured outline planning approval. Your personal performance and the performance of the very few project opponents during that process was dismal and widely accepted as a national embarrassment.

This project continues to enjoy the overwhelming support of the local residents, the Scottish business community, the Aberdeenshire Council and the Scottish Government. Prior to the public inquiry, the Scottish Chambers of Commerce, the Confederation of British Industry, the Scottish Council for Development and Industry, the Federation of Small Businesses, the Institute of Directors and numerous prominent business leaders united behind our efforts. This level of support was unprecedented and is even stronger today.

Our many supporters realize that during these difficult economic times, while other developers have been forced to cancel projects, the Trump International Golf Links - Scotland development

Councillor Debra Storr  
March 31, 2009  
Page 2 of 2

is moving forward and will create thousands of badly needed quality jobs and generate millions of pounds of revenue for the area. Because of our strong cash position we have invested tens of millions of pounds into the Scottish and local economies and will continue to do so for the foreseeable future. In fact, if you check the records, you will find that we do not even have a mortgage on the property - - - it is fully unencumbered. Additionally, we are the only organization that has studied the land at Menie and created a viable program to responsibly manage the site, stabilize the dunes and preserve them for many generations to enjoy.

In short, it has become clear to everyone that your bitter and negative campaign against this project is purely motivated by self interest and your irrational need to promote an extremely unpopular personal agenda. Unfortunately, your continued efforts to somehow make a name for yourself not only comes at our expense but more importantly, to the detriment of your constituents and the great country of Scotland - - - the place where my mother Mary was born.

These ongoing publicity stunts are disgraceful and you should be ashamed of yourself. We urge you to immediately refrain from obstructing our efforts and spare the Aberdeenshire Council and your community any further aggravation. They simply deserve much better than you and your publicity serving antics.

Very truly yours,

A handwritten signature in black ink, appearing to read 'Donald J. Trump', written over a horizontal line. The signature is stylized and somewhat illegible due to the cursive nature of the writing.

DONALD J. TRUMP

For immediate release - NA-PAW and EPAW

July 19 2012

## Prominent physician and surgeon Dr. Robert McMurtry calls for wind turbine moratorium

Dr. Bob McMurtry, a prominent member of the Canadian health establishment, joins the victims of industrial wind turbines (IWT's) in their call for Health Canada to turn over their future wind turbine noise study to Canadian Institutes of Health Research (CIHR). While the study is being conducted, they demand an immediate moratorium on all pending and proposed IWT projects.

The victims are represented by the North American Platform Against Wind Power (NA-PAW), and the European Platform Against Windfarms (EPAW), which regroup over 600 associations of victims from 26 countries. These federations, and Dr. McMurtry, are dissatisfied with the way the study is to be conducted. Health Canada (HC) being an arm of the Canadian government, they say, it offers no guarantee as to impartiality, which is the most crucial point in this matter.

Arm's length studies could be assured with involvement from CIHR, according to Dr Robert McMurtry: "research into adverse health effects is a good idea, but is being addressed by the wrong agency which is a regulatory branch of Health Canada. A better approach is to assign the task to the Canadian Institutes of Health Research, which reports to Minister Aglukkaq and is more capable of establishing causation, prevalence, and answering other important questions."

Recently obtained Health Canada Scientific Advisory Board documents reveal that HC have already agreed to not let the results be "causative," and not become a tally of how many people have been affected. These are the first signs that, already, the study is being used as a political stratagem, says Sherri Lange, of NA-PAW. She warns: "the study, if conducted by Health

Canada, may not provide the clarity and truth that is being demanded by Canadians.”

The victims are also concerned that the best specialists on the matter may not be consulted as they are not listed in the initial list of 25 experts to assist with this study. They also feel that, now that the authorities have finally admitted there could be a health problem, the principle of precaution must be applied and a moratorium must be called immediately.

Dr. McMurtry concurs: “the admission by Health Minister Aglukkaq that there are substantial gaps in our knowledge reveals the absence of evidence-based guidelines. There is thus the need for a moratorium on further IWT development until the requisite evidence of safe placement of wind turbines is available.”

Sherri adds: “several families and physicians have reported wind turbine associated heart attacks, and even suicides. When a family has lost home enjoyment and restful sleep, with no chance of recovering them, we have a recipe for despair. We cannot afford to wait another two years and a thousand more turbines till the study is done. The devastation of lives must stop immediately.”

We can't look to Europe for a solution to the health problem, says Mark Duchamp of EPAW. “Denmark recently conducted a study on the matter, but it was done by a consultant whose main client is the wind industry. As a result, it wasn't truthful, and monstrous 3 MW turbines continue to be installed too close to homes and workplaces at great risk to public health. Tricks were used in the measurements of low-frequency noise and infrasound, as denounced by Professor Henrik Moeller, a renowned acoustician from the University of Aalborg (1). In the circumstances, the world is looking at Ontario for, at last, an unbiased study. That must be the work of CIHR.”

The federations demand the participation of the following specialists in the study:

**Dr. Robert Y. McMurtry, M.D., F.R.C.S. (C), F.A.C.S., Canada; Carmen Krogh, BSc Pharm, Researcher Wind Turbines - Adverse Health and Social Justice, Canada; Stephen Ambrose, Acoustician, USA; Dr. Jeffery Aramini, Epidemiologist, Canada; Dr Arline Bronzaft, Noise and Health Specialist, USA; Dr Steven Cooper, ENG Fellow Australian Acoustical Society and Member of Institute of Noise Control, USA; Professor Phillip Dickinson, Acoustician, New Zealand; Barbara J. Frey BA, MA and Peter J. Haddon, BSc, FRICS, Scotland; Dr Christopher Hanning, BSc, MB, BS, MRCS, LRCS, LRCP, FRCA, MD, Sleep Disturbance and Wind Turbines, UK; Professor Colin Hansen, Acoustician, Australia; Dr Magda Havas, Biological and Health Effects of Electromagnetic and Chemical Pollution, Canada; Richard James, INCE Acoustician, USA; Dr Mauri Johansson, Specialist in Community Health**

and Occupational Medicine, Denmark; Dr. Sarah Laurie, CEO Waubra Foundation, Australia; Professor Henrik Moeller, Acoustic Specialist, Denmark; Dr. Michael Nissenbaum, Radiologist, USA; Dr. Carl Phillips, Epidemiologist, USA; Dr. Nina Pierpont, Author of Wind Turbine Syndrome, USA; Robert Rand, Acoustician, USA; Dr. Daniel Shepherd, Noise and Health Specialist, New Zealand; Dr Malcolm Swinbanks, Acoustician, UK; Dr. Robert Thorne, Health Sciences and Acoustics, Australia.

**The Honorable Nicola Sturgeon  
First Minister of Scotland  
St Andrew's House  
Regent Road  
Edinburgh  
EH1 3DG**

**Dear First Minister,**

**I have heard a movement is going on in Scotland. I only wish I would have been informed prior to my 200 million pound investment at Turnberry where we are building new ballrooms, suites, and a new golf course (together with a total renovation of the great Ailsa course). This will totally revitalize South Ayrshire.**

**I look forward to meeting you one day.**

**Sincerely,**

A handwritten signature in black ink, appearing to read "Donald J. Trump". The signature is written in a cursive, somewhat stylized script. Below the signature, the name "Donald J. Trump" is printed in a bold, sans-serif font.
