Record submitted by		Project details				Invasive species details			Funding details			
Name	Project area (Geographical)	Project managed by	Short description	Start date	End date	Contained/managed	Eradicated	Body/scheme(s)	Total amount	Value for 2013	Value for 2014	Value for 2015
<p><b>BACKGROUND</b> The Non-Native Species Action Group, at their November 2013 meeting, agreed that gathering details on INNS projects supported by public funds would create a useful resource. Members of the group agreed to provide information on projects that their organisations were supporting financially or projects that they were aware of that were supported by other funds. The group will provide up to date information, twice a year when requested.</p> <p><b>TO NOTE - disclosure of information</b> Any information on this spreadsheet will be made available to other members of the Action Group and, on request, to the Scottish Biodiversity Strategy Committee or its subgroups. This spreadsheet will also be released should any member of the public ask for it and will be made available on the Scottish Government website in due course.</p> <p><b>INSTRUCTIONS</b> highlighted yellow on first line</p>			<p>A short description of the project - in particular where the project name does not give much idea what the principal aims of the project are, include for example, whether this follows on from other projects or works with other projects or whether it is a stand alone project. What is the project address, what is the project being funded, what are the project address, priorities as set out by international/national/regional strategies, what aspects of the project are new or innovative, especially if such approaches would be of interest to others designing new projects.</p>	Start date	End date	<p>List of INNS that will be reduced, managed or contained as part of the project. Include information with a view to updating the species at a point after the end date stated at column F.</p>	<p>List of species that will be eradicated as part of the project (eradicated by the end date stated at Column F)</p>	<p>List of bodies funding the project - including the project partners involved (for example SEPA, Restoration Fund)</p>	<p>Total value of the project - taking into account all the years that the project will run and all of the funding agreed.</p>	<p>Breakdown of the value of the project by calendar year - the information requested covers the period from 1 January 2013, as agreed by the Action Group in November, to fit with biodiversity reporting.</p>		
	The Shiant's Seabird Recovery Project	Shiant Islands	Restore nesting habitat for burrow nesting seabirds	2014	2018	Black rat	Black rat	<p>LIVEN, NISBE, SHAWMUR, the Nicolson family, SNH</p>	900,000	112,500	247,500
