Dear [REDACTED]

Felling Permission Application (Forestry and Land Management (Scotland) Act 2018)

Case Reference: FPA-8672

Property Name: Dunecht Estate A73&74 - Storm Arwen

I refer to your application referenced above and I now enclose the approved Felling Permission. If you are an agent receiving this Felling Permission on behalf of the owner, you are obliged to forward a copy to the owner for their retention.

We approved your application on the basis that we consider it has addressed all known issues relating to the application area, and demonstrates sustainable forest management in line with the principles of the UK Forestry Standard

Please note the felling approval period associated with this Felling Permission. If felling has not been completed by the end of this period, a new permission will be required.

If this application has been approved with conditions, and you do not agree with the stated conditions, then you may appeal our decision for these under section 68 of the Act. For more information please see our website or contact the issuing office.

Yours sincerely

[REDACTED]

Admin Officer

Permission to Fell Growing Trees

Permission Number:FPA-8672

To:

[REDACTED]
Dunecht Estates
The Estate Office
Dunecht
westhill
Aberdeenshire
AB32 7DQ

This Felling Permission authorises you under section 27 of the Forestry and Land Management (Scotland) Act 2018 to fell the trees described below and shown on the attached map.

This Permission expires on: 17-Dec-2022

Part 1: Felling

Name of Property:Dunecht Estate A73&74 - Storm Arwen

Name of Wood:Hill of Fare

Central Grid Reference: NJ738038

Nearest Town or Locality Name:Westhill

Local Authority:Aberdeenshire Council

Table 1: Felling Operations

Felling Site/Cp t	Type Of Operation	Species to be Felled	Marki ng Of Trees	Est. Area (ha)	Approx Age (years)	No of Tre es	Est Volume (m3)	Thinning details (per ha) Pre	Thinning details (per ha) Post
A73	CF - Clear Felling	Scots pine	n/a	13.90	90	-	3,892.00	-	-
A74	CF - Clear Felling	Scots pine	n/a	6.30	61	-	1,764.00	-	-
A75	CF - Clear Felling	Scots pine	n/a	2.90	90	-	725.00	-	-
A75	T - Thinning	Scots pine	n/a	7.50	90	-	300.00	300	260

Total Felling Area (ha) **23.10**

Total Volume (m3) **6,681.00**

Total Thinning Area(ha) **7.50**

Thinning Representation: Pre/Post stocking density

Note: Operations in Table 1 represent the total felling to be carried out within the approval period and not approval per year.

Part 2: Conditions

1. Site Preparation Conditions

The land on which felling took place, or the agreed alternative area, must be cleared, drained and prepared, as required, to allow restocking as specified in Table 2.

2. Restocking Conditions

Table 2 below details the restocking specification for each of the felled areas.

You must restock all felled areas as detailed in Table 2. Restocking must be completed by 30-Jun-2025

Table 2: Restocking Operations

Felling Site/Cpt	Restocking Proposal	Species	% of Site	Area (Ha)	Density (stems/Ha)	Number of Trees	Alternative Restocking Site/Cpt(s)
A75	RF - Replant felled area	Scots pine	12.5 5	2.90	2500	-	-
A74	RF - Replant felled area	Scots pine	27.2 7	6.30	2500	-	-
A73	RF - Replant felled area	Scots pine	39.3 9	9.10	2500	-	-
A73	RF - Replant felled area	Norway spruce	20.7 8	4.80	3000	-	-

3. Maintenance Conditions

For a period of 10 years from the restocking date the trees must be protected from all damage and weeded adequately to allow effective establishment.

Failures or losses must be replaced as necessary to maintain a stocking density not less than is specified in Table 2, evenly distributed across the site.

4. Other Conditions

All forestry operations carried out under this permission will be planned and implemented within the scope of the UK Forestry Standard.

You will provide a summary to Scottish Forestry of restocking carried out against this permission immediately after the works have been carried out, or by the restocking deadline in Part 2, whichever is sooner.

5. Additional Conditions

No additional conditions specified for this site

Permission approved by: [REDACTED] - Senior Operations Manager Date: 17-Dec-2021

grampian.cons@forestry.gov.scot

Conservator: James Nott

Additional Notes:

1. If a Tree Preservation Order is placed on any of the trees after this felling permission is issued, the consent of the Local Authority must be obtained before they are felled.
2. Others involved with the felling should be told about this felling permission e.g. by giving a copy of the permission and map to the person felling the trees. If the land is sold, the new owner should also be told about this felling permission.
3. Please refer to the agreed routes for timber haulage. The agreed routes map can be viewed on the Timber Transport Forum website (<http://timbertransportforum.org.uk/>). As many routes are subject to consultation or restrictions you should discuss and agree your haulage plans (routes and volumes) with the local authority in advance of commencing operations.
4. Under the Nature Conservation (Scotland) Act 2004 as amended by the Wildlife and Natural Environment (Scotland) Act 2011, anyone planning, permitting or carrying out forest operations or other activities in woodlands should be aware of their wildlife protection responsibilities.
5. Under the Water Environment and Water Services (Scotland) Act 2003, anyone planning, permitting, or carrying out forest operations or other activities in woodlands should be aware of their responsibilities for the protection and improvement of water quality and aquatic ecosystems. See <http://www.forestrywaterscotland.com/> for more information.
6. If you are to fell Larch within the *P. ramorum* Zone 1 (outside the Management Zone) or Zone 2 areas where you are within 10km of a known infection (which are indicated on the regularly updated map), you must contact your local Conservancy Office before you begin felling to find out if the stand needs to be inspected to confirm the presence or absence of *Phytophthora ramorum*. The inspection cannot be carried out until the trees are fully in needle.

7. Forestry can be dangerous. The Forest Industry is working together to raise the standards of health, safety and welfare in the work place. More information can be found at: <http://www.ukfisa.com/>

UK Timber Regulation

Due Diligence checklist for timber grown in Great Britain

This document is intended to help meet the obligations placed on "operators" to undertake a risk assessment when placing timber or timber products on the market, as defined under UK legislation governing timber legality. It outlines the risk factors associated with timber grown in Great Britain (see overleaf).

The details of the timber species, timber volume etc. are listed on the Felling Permission or Forest Plan.

Evidence of Lawful Harvesting

1. Felling Permission Ref No(s) or Statutory Plant Health Notice (SPHN) number	Date Approved
FPA-8672	Fri, 17 Dec 2021

(If the recipient of the felling permission, or SPHN is felling the timber but not directly placing it on the market then the due diligence form must be passed to the agent or company who are doing so).

OR

2. Forest Management Plan Ref No (s)	Date Approved

[Redacted Signature]

Senior Operations Manager, Scottish Forestry

Date:

Fri, 17 Dec 2021

3. In absence of felling permission, or SPHN or forest plan:
Where the timber came from :
Name & Address of Supplier/Land Owner:
Reason the timber does not derive from an approved felling permission or a forest plan:

Certification: If the timber is independently certified enter the certificate number below:

--

Additional Risk Factors: If there are any factors (not covered overleaf) that indicate a risk that the timber could be illegally harvested, enter these below with an explanation of how that risk has been mitigated.

Factor	Means of Mitigation

Declaration by the operator: I declare that the timber referred to above is grown in Great Britain. I have identified any additional risk factors and the action taken to mitigate that risk, and I have no reason to believe that there are further risks of the timber being illegal.

Signed:

Dated:

Further guidance on timber regulations can be found at:

<https://www.gov.uk/guidance/trading-timber-imports-and-exports-from-1-january-2021>

The timber described overleaf was produced from forests in Scotland, part of Great Britain, where the following risk factors apply.

1. Illegality - Forests in Scotland are regulated by Scottish Forestry, an executive agency of the Scottish Government. The incidence of illegal felling in Scotland is low, estimated at much less than 1% of the timber volume harvested.

2. Governance - Great Britain is ranked highly for good governance in independent assessments, such as The Worldwide Governance Indicators project (funded by The World Bank). Moreover forestry proposals in Great Britain are available for comment and Great Britain is well served by bodies from civil-society that contribute specialist knowledge and opinion to the assessment of forestry proposals.

3. International Perspective - There is no UN Security Council ban on timber exports from Great Britain and Great Britain is not associated with or designated as a source of 'conflict timber', both of which are key international indicators of illegality.

4. Forest Regulation - Scotland has specific forest laws (principally, The Forestry and Land Management (Scotland) Act 2018) which convey powers to regulate forestry activities, control felling, administer woodland grants and to manage state forests. The Forestry Commission issued a revised UK Forestry Standard (UKFS) in 2017 which provides a benchmark against which forestry is regulated and is explicit in terms of legal requirements and the assurances of legality and sustainability that can be given by the process of forest regulation. Scottish Forestry are the competent authority with respect to Forestry (Environmental Impact Assessment) (Scotland) Regulations 2017. The Forestry Commission reports on behalf of the United Kingdom the sustainability of UK/Great Britain forests in the Global Forest Resources Assessment and Forest Europe indicators and compiles annual statistical information. Scottish Forestry contributes to this reporting. These various sources of information indicate that forests in Scotland, part of Great Britain/UK, are managed on a sustainable basis.

5. Endangered Timber Species - There are no endangered timber species present in Great Britain.

6. Assessment of UK grown timber by the certification schemes - The two major international certification schemes, FSC and PEFC, have assessed Great Britain as being of low risk in terms of their "Controlled Wood" and "Avoidance of Controversial Sources" respectively. This allows up to 30% of non-certified home grown timber to enter supply chains. Approximately 80% of timber coming to the market in Great Britain has been independently certified as coming from well managed forests. This is in addition to the regulatory processes outlined above.

Notes for completion of form

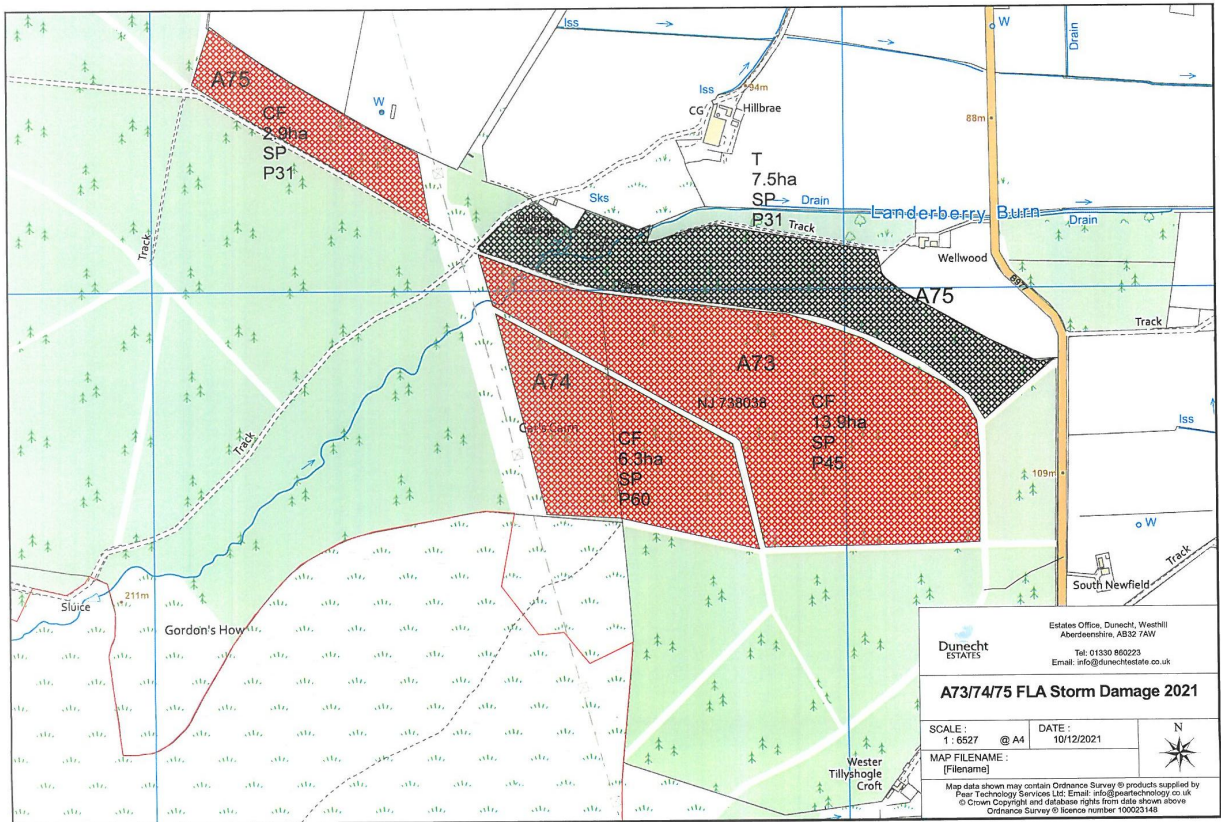

The person who first places timber / timber products on the market or uses them is defined as an 'Operator' under the Regulation:

If you are a landowner, harvesting and selling the trees, then complete this form and keep it with the felling permission/forest plan or other details (as appropriate) together with details of the contract for sale of the timber.

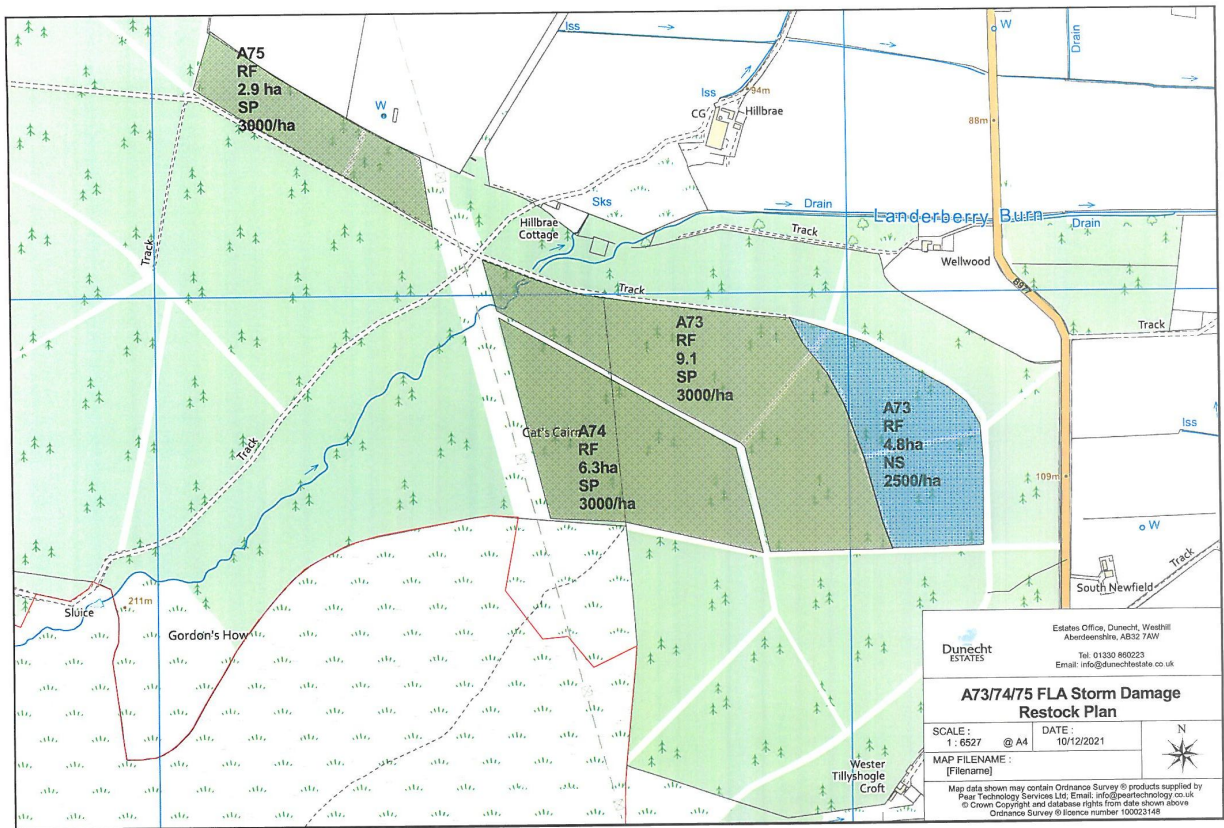

If you are buying the timber 'standing' and harvesting the trees, then complete this form, ask for a copy of the felling permission or forest plan approval from the owner and keep this form together with details of the contract for purchase of the timber.

It is important to keep a record for at least 5 years, as required by the legislation, of timber sales and purchases.
