

SCOTTISH DONATION AND TRANSPLANT GROUP (SDTG)
Thursday 19 August 2021, 14:00-16:00

Living Donation Update

Submitted by Jen Lumsdaine, Living Donor Co-ordinator, NHS Lothian

Education and publicity

Living Donation Scotland continues to work in partnership with Kidney Care UK facilitating a series of webinars for patients, public and clinical staff. The June event received over 100 registrations. The next event 'Kidney care in a multicultural Scotland' is scheduled for 2nd September 2021 at 6pm. Multi media publicity continues with Smarts Communications with releases in June 21.

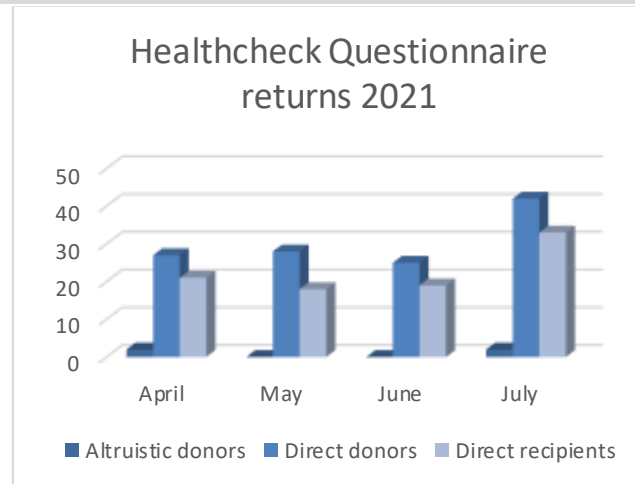

REACH Transplant

The Donation and Transplantation Plan for Scotland:2021-2026 recommends for the Renal Education and Choices at Home programme currently being piloted in NHS Lothian to be evaluated with a view to national rollout. This evaluation and report is in progress and will be submitted shortly for approval.

Schools Resource

Work has continued with the primary and secondary schools resource with inclusion of living donor transplant information. It is highlighted within the education that children are never allowed to be living donors.

The number of healthcheck questionnaire returns to all units (preliminary data)

We have changed the data collection for healthcheck questionnaire returns including all units and the number of recipient offers. This will give a clearer indication of social media appeal impact; general media response and unit workloads.
