## EXPLANATORY NOTES

Unless otherwise stated the tables relate to fish of British taking landed in England and Wales.

**Landings.** The different kinds of fish are divided into three main groups : Demersal, Pelagic and Shell. The name of each kind of fish included under each group is shown in Table I.

**Place of Capture.** (See tables 4, 5 and 8). The fishing grounds are divided into statistical regions which are given in detail on page 5.

“ Distant Waters ” include the Barents Sea and waters adjacent to Bear Island, Spitzbergen, Greenland, Iceland, Labrador, Newfoundland, the Norwegian Coast, Skagerak and the Mauretanian Coast.

“ Near and Middle Waters ” comprise the North Sea, the Irish Sea, the Bristol and English Channels and waters adjacent to the Faroes, Rockall, West of Scotland and West and South of Ireland.

**Deep Sea Landings** include catches by Steam Trawlers and by all other vessels making voyages of over 72 hours duration.

**Inshore Landings** include catches by second and third-class vessels, and by first-class vessels, other than Steam Trawlers, which make voyages of not exceeding 72 hours duration.

# MONTHLY DIGEST OF STATISTICS

The Digest, which is prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments, provides industrialists and business executives with invaluable statistics relating to the economic situation in the United Kingdom. Where available, pre-war figures are given as well as those for the war years, which were not then published for security reasons. Monthly figures are given for the last two years.

Statistical information is at present arranged under the following headings and the scope

is revised from time to time to include new statistical information as it becomes available.
