FHI 059, Version 12		Issued by: FHI	Date of issue: 08/10/2018
Case No: 2019-0338			Date of visit: 16/07/2019
Time spent on site:	hrs	Main In	spector:
Site No: FS1043 Business No: FB0095	Site Name: Business Name:	Ness of Copister Cooke Aquaculture Sco	tland Ltd
Case Types: 1 ECI	2 CNA 3 SLI	4 VMD 5 ESC	6
Water Temp (°C): 10.9	Thermometer No:	T148	FHI 045 completed N/A
Observations:	Region: SH	Water type: S	CoGP MA S-4
Dead/weak/abnormally behaving Clinical signs of disease observed Gross pathology observed? Diagnostic samples taken?	•	N If yes, see additiona	al information/clinical score sheet. al information/clinical score sheet. al information/clinical score sheet.
UNI/REG only - if unable to carry	out intended visit deta	il reason below:	

Additional Case Information:

Waste transfer notes not held at site. Held at mid-Yell but were made available. FMA doesn't state whether one or more yearclass in the area at any one given time but they do fallow sync.

Fish sampled for VMD looked to be in good condition both externally and internally.

An enhanced containment inspection was carried out at the site. An initial escape notification had been submitted to the FHI on 17/12/2018 (Ref. No. MSe161218SAL1) after a 1m x 1m hole was discovered in net of one pen at a depth of 4.5m after storm force 9-10 winds during previous 2 days. Net was repaired by divers on 17/12/2018. All fish were harvested out by 15/01/2019 and all fish were accounted for. New mooring grid has since been installed and site remodelled and equipped to a level that meets new standard.

FISH HEALTH INSPECTORATE VISIT REPORT

SUMMARY FOR INFORMATION OF SITE OPERATOR

Business NoFB0095Date of Visit16/07/2019Site NoFS1043Site NameNess of CopisterInspectorCase No20190338

ENHANCED CONTAINMENT INSPECTION

An enhanced inspection to ascertain the risk of escape from the fish farm was conducted in accordance with the Aquaculture and Fisheries (Scotland) Act 2007.

The visit consisted of an inspection of facilities, records and the provision of advice.

a) Inspection of i) escape incidents and ii) contingency procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

b)i) Inspection of records relating to equipment, facilities and the site

Minor issues were raised regarding records relating to equipment, facilities and the site.

The following recommendations are made for improvement.

To meet the requirements of schedule 2, section 1 of the Fish Farming Businesses (Record Keeping) (Scotland) Order 2008 farmers should also maintain records of:

- e) i) the name of the person conducting the inspection.
 - ii) the date of each inspection.
 - iii) the place of each inspection.
 - iv) the outcome of each inspection.

f) the date and result of each repair, equipment test and antifouling treatment carried out.

To also meet the requirements of schedule 2, section 2 of the Fish Farming Businesses (Record Keeping) (Scotland) Order 2008 in relation to each net, a record must be kept of:

iv) the depth of water between the bottom of the net and the seabed as measured at the mean low water spring.

It is recommended that in accordance with A Code of Good Practice for Scottish Finfish Aquaculture (CoGP) (Chapter 4, section 4.19) site managers should demonstrate an awareness of the minimum fish size supplied at input and at other relevant times in relation to net mesh size.

b)ii) Inspection of records relating to training

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

b)iii) Inspection of records relating to procedures and risk assessments

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

c) Inspection of site and site equipment

Following the containment issue in December 2018, the site was re-designed and new mooring equipment was installed.

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

d) Inspection of site specific procedures

The site meets the requirement of current Scottish industry best practice. No recommendations made or further action required.

Further Action

The recommendations in this report should be implemented by 31/01/2020. Documentation should be provided as evidence that the recommendations have been implemented. Enforcement action may result if the recommendations are not implemented in the necessary time frame. Records should be sent to Marine Scotland Science's Fish Health Inspectorate (FHI) (contact details are provided below).

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.

Inspection under the Aquatic Animal Health (Scotland) Regulations 2009

The above site was inspected, in accordance with the Aquatic Animal Health (Scotland) Regulations 2009, and to meet the requirements of European Community Council Directive 2006/88/EC.

All epidemiological units were inspected. On this occasion no samples were taken for disease analysis. The Inspector did not observe any clinical signs associated with the listed diseases as described in the Aquatic Animal Health (Scotland) Regulations 2009.

Records

The surveillance frequency category of the site was assessed as low. An inspection under the Aquatic Animal Health (Scotland) Regulations 2009 will be conducted every third year. The category of the site will be reassessed on a routine basis and updated as required.

The information required for the public record of aquaculture production businesses regarding this site was verified and where necessary updated. The following records were also inspected to ensure that the conditions of authorisation for your Aquaculture Production Business (APB) are being met:

Aquaculture animal and aquaculture animal product movement records were inspected and appeared to be adequately maintained.

Mortality records were inspected and found to be adequately maintained.

No mortality levels exceeding the reporting criteria have been recorded since the last inspection.

Reports detailing the results of animal health surveillance carried out by or on behalf of the business and/or Marine Scotland were available for inspection.

The biosecurity measures plan for the site was inspected and found to be adequately maintained and implemented.

Inspection under the Animals and Animal Products (Examination for Residues and Maximum Residue Limits) (England and Scotland) Regulations 2015

Medicine records were inspected and found to be adequately maintained.

Samples were taken to be analysed for veterinary residues.

Inspection under the Aquaculture and Fisheries (Scotland) Act 2007

The site was also inspected in accordance with the Aquaculture and Fisheries (Scotland) Act 2007, as amended, with respect to section 3 regarding parasites (sea lice) and section 4A regarding fish farm management agreements and statements.

On this occasion the site was found to be satisfactory with regards to parasites and fish farm management agreements and statements.

An enhanced containment inspection was conducted. A separate report will be issued in due course.

Please contact myself or the duty inspector should you require any further information or have any queries regarding this report.
